GEORGIA STATE UNIVERSITY • CBN / TRENDS • DANA NEXTGEN FELLOWSHIP

NeuroEngage Outreach — Cumulative Progress

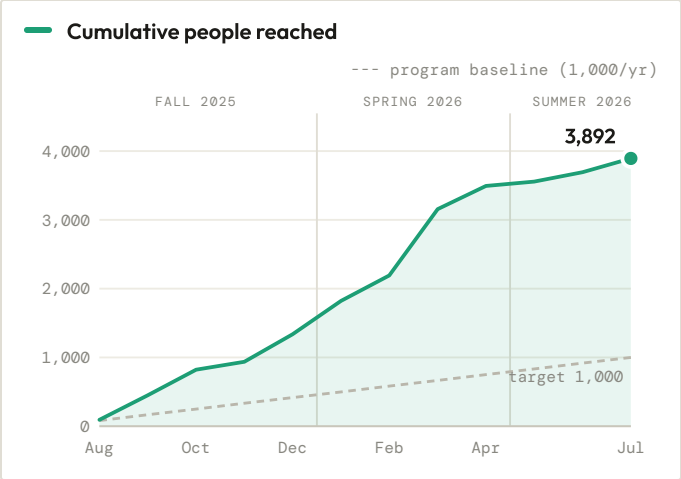

Prepared for Dana Foundation reporting

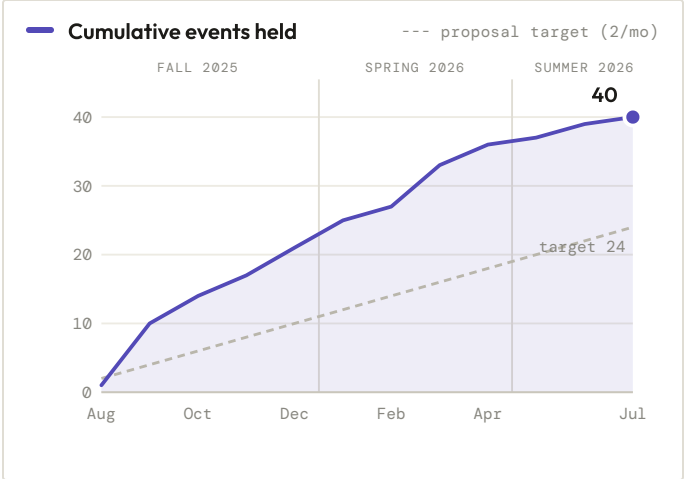

Reporting period **Fall 2025 – December 2027** This snapshot **Aug 2025 – Jul 2026** Generated **August 17, 2026**

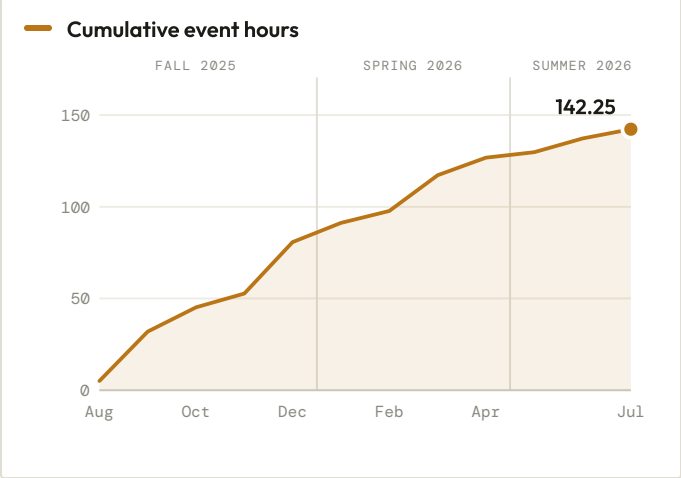

EVENTS HELD	PEOPLE REACHED	EVENT HOURS	DISTINCT VOLUNTEERS
40	**3,892**	**142.25**	**98**
outreach sessions since fall 2025	K-12 students & members of the public	total duration of events run	14 have led events

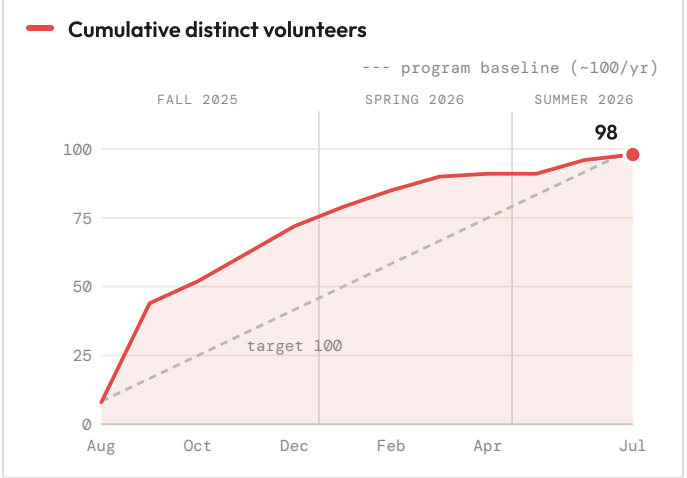

GROWTH OVER THE GRANT REPORTING WINDOW

Each panel accumulates month by month, so any point reads as "total to date." Zero marks the start of the reporting window, not the program — outreach predates the fellowship, and the dashed lines carry that history as its pre-grant pace; the distance above them is this year's growth.

TERM SNAPSHOTS

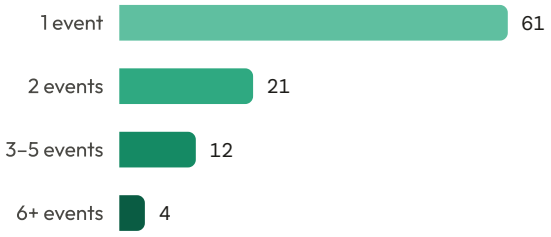

What each academic term contributed; the bottom row is the total for the reporting window.

TERM	EVENTS	PEOPLE REACHED	HOURS	VOLUNTEERS ACTIVE	NEW VOLUNTEERS
Fall 2025	21	1,338	80.75	72	72
Spring 2026	15	2,154	46	37	19
Summer 2026	4	400	15.5	15	7
Total since fall 2025	**40**	**3,892**	**142.25**	**98 distinct**	**98**

"Active" counts a person once per term; "new" = first event since fall 2025. In the total row, volunteers are counted once across the whole window — which is why the distinct total equals the sum of new volunteers, while active counts don't add up (returning people appear in several terms).

VOLUNTEER ENGAGEMENT & REPEAT SERVICE

Volunteers by number of events served

- Outreach is running at **3.3 events/month** — ahead of the proposal's Goal 1b target of doubling from one to **two events per month**.
- Crews average **4.8 volunteers per event** (proposal baseline: 3–4), and **37 of 98 volunteers (38%)** have served at two or more events — every name is captured on the intake form, so repeat service is trackable today.
- **14** different people have led at least one event.
- The signature lesson plans named in the proposal (Touch-a-Brain, Build-a-Brain, Build-a-Neuron) ran at **32 of 40 events**.

VOLUNTEER ROSTER (EVENTS SERVED)

Kyle Frantz	**×13**	**Faustina Merveille**	**×2**	Darrin Stampe	×1	Maliah Trostmann	×1
David Waxler	**×12**	**James Saint Vrestil**	**×2**	Davena Mgbeokwere	×1	Mariana Romo	×1

METHOD NOTES

- This report is the "breadth" arm of the NeuroEngage evaluation plan — the event database tracking trainees and learners engaged. Depth measures (self-efficacy surveys, focus groups) are collected separately.
- Charts measure the grant reporting window only. NeuroEngage outreach has run for years before this fellowship (see the program's annual DMAP infographics); the dashed baseline paces summarize that prior performance level.
- Target paces on the charts come from the funded proposal: Goal 1b doubles outreach from one to two events/month; the program's stated baseline is at least 1,000 K-12 students & members of the public and ~100 volunteers annually.
- Source: Microsoft Forms outreach reports (outreach_export_2026-05-25.csv, outreach_export_2026-08-12.csv), merged so a later export can correct but never erase an earlier value.
- 3 earlier pilot events (before Aug 2025: 104 attendees, 9 hours) precede the reporting window and are not included here; they remain on the live dashboard.
- Academic terms: Fall = Aug–Dec, Spring = Jan–Apr, Summer = May–Jul.
- Attendance entered as a range is counted at its midpoint and flagged as an estimate; "event hours" is the duration of each event, not person-hours.
- Volunteer counts are floors: group entries (e.g. "lab members") and unnamed helpers are not counted; spelling variants of the same person are merged.
